Climate Statement 2026

Fixture Test Group. Climate-related financial disclosure prepared under AASB S2 Climate-related Disclosures for the year ended 30 June 2026.

Governance. The Board Sustainability Committee is responsible for oversight of climate-related risks and opportunities. The committee receives a written report from management each quarter and reviews climate targets annually.

Management's role. The Chief Sustainability Officer is the executive responsible for assessing and managing climate-related risks and chairs a climate working group that meets monthly. Climate controls are tested by internal audit each year.

Strategy and scenario analysis

We identify physical risk, including flooding at two distribution sites, and transition risk, including carbon pricing and changing customer demand. Each is assessed over short (to 2028), medium (to 2035) and long (to 2050) time horizons.

Scenario analysis. We tested the resilience of our strategy against a 1.5°C scenario and a 2.7°C scenario. Under the 1.5°C scenario, carbon costs rise materially after 2030; under the 2.7°C scenario, physical damage to sites becomes the larger exposure.

Risk management, metrics and targets

Climate risk is recorded in the enterprise risk register and assessed with the same likelihood and consequence scales as other risks, so it is integrated into the risk management framework rather than managed separately.

Scope 1 emissions were 12,400 tCO2-e and Scope 2 emissions were 8,900 tCO2-e, calculated using the National Greenhouse and Energy Reporting methodology.

We have not reported Scope 3 emissions this year because supplier data covers less than a third of spend. We expect to report Scope 3 from FY2028.

Our emissions reduction target is a 42% reduction in Scope 1 and Scope 2 emissions by 2030 from a FY2022 base year. Progress against target: emissions are down 18% compared to the base year.

Scope 1 and Scope 2 emissions are subject to limited assurance by an independent assurance provider. The assurance statement is published with this report.
